Dear Mr. Lesar,

I am deeply concerned about the production of MOX from weapons plutonium on the Savannah River Nuclear Site. Radioactive waste volumes will increase even further and transport of plutonium is dangerous. I will no longer travel to Augusta or Savannah from Atlanta if this production of MOX takes place at the Savannah River Site. I urge you to reconsider the decision to use this site to generate dangerous radioactive fuel. Would you want it in your backyard? Certainly not!

Sincerely,
Diane F. Matesic
