U.S. Nuclear Regulatory Commission

Forgive my hand written letter for I have not time for typing this letter must reach you before Oct 2, 2002.

Before you Comes the Louisiana Energy Service they want a ruling to stop citizens their right to know right to ask question. We do not want LES here plain and simple. our enviroment is at stake. you see Tennessee Farmers mainly earn a living by selling tobacco. the LES Uranium enrichment is not American Company they dont understand. they plan to let gases go into the air, that will cause

ERIDS = ADM-03
Added - T. Jackson (TES)

Hampette - ADM-013

death and long time suffering
tobacco, Corn live stock
Crops of other nature will
no longer be USDA approved
because of the radio active
contamination from the Uranium
plant. I come to you begging
you not to give LES any
licenses or approval for any
thing to cause uranium plant
to come here, NRC you all
are americans, do you
soon forget September eleventh
do you want that to happen again
if you give LES licenses and
approval to put a Uranium
enrichment plant here in
Tennessee, it would be the
same as if Hartsville was the
World trade Center, NRC
was the plain and LES was
the terrorist who attacked
america. Do you all really
want children to die,
Do you all have kids or
Grand kids. For a moment

close your eyes picture
them in a casket dead
can you feel how heart
wrenching it is, what if
you could stop their death
would you, I would,
I am. Please do not
cause what happen to
New York and Penn. and
Washington happen here
We do not want L.E.S
here, We want to live
in harmony with the
enverirement. Don't let L.E.S
destroy our enverirement
here. We have the right
to live in peace with the
enverirement please dont
destroy that

Sincerelly
Barbara Crossman
