Dear. Mr. Lesar,

My name is Chris Lugo and I am a concerned citizen who lives 40 miles downstream from the proposed uranium enrichment facility in Hartsville, Tennessee. I do not think there is a need for yet another Uranium Enrichment facility in the United States. In addition I am concerned about LES Financial qualification and the fact that the major investors are all foreign corporations. I went to a public hearing last week in Hartsville and I was not persuaded that LES is going to get rid of depleted uranium in a timely manner from the facility. I do not think that the NRC should not consider any request by LES-Urenco to limit public comment in any way, additionally you should allow plenty of time to study the situation in full and extend comment and allow more comment periods on this issue.

Sincerely, Chris Lugo
