Dear Mr. Lesar:

I emphatically object to Louisiana Energy Services' receiving pre-approval for how it handles Uranium in Tennessee. It's too dangerous for these regulations to be softened. Until we find an answer to the storage of spent nuclear fuels, it seems clear to me that we should at least stop generating them, and then keep finding safer ways to store them.

Letting LES self-regulate will be like letting Wall Street self-regulate: a disaster punctuated by a tragic crash of life and hope.

Please resist the temptation to let these greedy tycoons get away with polluting. Be strong!

Sincerely, Danielle Cohen
