Oct. 28/02.

To the U.S. Regulatory Commission;

As a concerned resident of the Hartsville Area surrounding Smith Co. I would like to voice my opposition to the building of the proposed Hartsville, TN site.

My concerns to this Uranium plant are the 1) disposition of depleted uranium left over after processing. We don't have any containment or certified waste facility. Any leakage from the stored on site would endanger our fertile farmland surrounding the proposed site. Many springs flow underground throughout this area that ~~also~~ would contaminate the water & poison our livestock & forage crops. This adverse effect would

Add=T. Johnson (TCS)

damage our soil ~~permently~~ permanently, permanently & future generations to come.

2) The need for a uranium enrichment facility.

3) Wether such a plant would have an adverse effect on minority or poor residents

and

4) Les' financial qualifications.

I am very concerned as this effects my quality of life, farmland & family. We are not qualified to handle such an uranium site with proper facilities. Please take in consideration my views & concerns and respond in our favor.

Sincerly

Karree J. Phillips
