Mrs. Elizabeth Donoho
5 Thompson Ln.
Hartsville, TN 37074

November 12, 2002

Dear Mr. Lesar:

Please help Trousdale County Tennessee escape from the clever plan to burden Hartsville and the surrounding area with a future of nuclear waste.

Tennessee has already done its part with the birthing of the nuclear bomb. Oak Ridge is not yet completely free of radiation problems. It may never be.

Please consider the early deaths, the painful symptoms you may be able to prevent by avoiding this takeover of LES.

It is beyond my understanding why educated people will allow this to happen to such a beautiful state. No one seems to want the plant except the ones who are trying to force it on us. We have not been allowed to vote on it.

It will not help the Hartsville area but rather keep other industries from coming here.

Sincerely,
Elizabeth M. Donoho
