TRANSMITTAL OF YUCCA MOUNTAIN SITE CHARACTERIZATION PROJECT (YMP) TECHNICAL DATA CATALOG, DECEMBER 31, 1994 (SCPB: N/A)

Enclosed is the December 31, 1994, edition of the YMP Technical Data Catalog. This document is updated and released quarterly in accordance with the U.S. Department of Energy/U.S. Nuclear Regulatory Commission Site-Specific Procedural Agreement. The catalog contains a listing of data collected during the characterization of Yucca Mountain, Nevada, as a potential site for a high-level radioactive waste repository. The data referenced in the catalog are primarily items that were generated for YMP and submitted to the Automated Technical Data Tracking System (ATDT) since March 29, 1990. Information related to data items collected before that date are being added to the ATDT and catalog as time and funding allow.

This quarterly supplement to the catalog provides an update of data items added to the ATDT data base since September 30, 1994, and data items affected by changes. The September 30, 1994, data catalog should be retained and used as the baseline document until the next complete revision is published in October of next year.

Questions or comments on these documents should be directed to Claudia M. Newbury at (702) 794-7942.
