DOCKET NUMBER
PROPOSED RULE PR 20
(68FR09595)

May 14, 2003

DOCKETED
USNRC

May 28, 2003 (1:07PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Secretary U.S.-N.R.C.
Attn. Rule-Making and Adjudication Staff
Washington, D.C. 20555

Rule-Making Staff:

It is my understanding that Oak Ridge is at this time selling low-level radioactive materials. Perhaps we are including that material in our bullets.

Both of the aforementioned ideas (reality) are an extremely bad idea!

The birth defect rate since the Gulf War has risen substantially. After this current Iraqi war, probably the results will be similar. This is a HORRIBLE plague to release on a relatively innocent civilian population.

At one time in the past radioactive materials in metal were transported to Mexico. How and why? These materials were made into pedestals for soda-fountain tables and sold back into Texas. People got very sick.

Please STOP SELLING RADIOACTIVE MATERIALS from Oak Ridge or anywhere.

Thank you, Gayna Uransky
