Dr. Andrew C. Kadak, President
Yankee Atomic Electric Company
580 Main Street
Bolton, Massachusetts 01740-1398

Dear Dr. Kadak:

In the Chairman's response to your letter providing her with a copy of your paper, "An Intergenerational Approach to High-Level Waste Disposal (That Might Work)," she indicated that the staff would provide you with a copy of the draft Branch Technical Position (BTP) on " A Performance Assessment Methodology for Low-Level Radioactive Waste Disposal Facilities" when it became publicly available. I have enclosed a copy of the draft BTP which was announced as being available for public comment on May 29. The public comment period extends for 90-days

As noted in the Chairman's letter, the draft BTP addresses the issue of time frame of compliance for low-level waste facilities. Your involvement in discussions of an appropriate public health and safety standard for Yucca Mountain and your specific knowledge of the time frame of compliance issue as it relates to high-level waste disposal, provide you with unique insight. Therefore, the staff is interested in your comments on the draft BTP in general and the time frame of compliance issue in particular. To facilitate your review and comment, I would like to offer to meet with you at your convenience to discuss the issue of time frame of compliance for waste disposal facilities.

Sincerely,

[Original signed by:]

Michael J. Bell, Acting Chief
