Dear Dr. Cranwell:

SUBJECT: COMMENTS ON MONTHLY REPORT FOR FIN-A1165 (OCTOBER, 1986)

I have received your report summarizing the activities during the month of October for FIN-A1165. Comments and clarifications regarding the October monthly report, as well as, some additional questions regarding my comments on previous reports are as follows:

1. Through an error you were given the wrong figures for the FY87 funding, the correct funding for FIN-A1165 is 375K plus any carryover. Sandia should evaluate the work proposed under each Task for FY87 and apportion the appropriate FY87 funds for each task. Please notify me of the breakdown of the FY87 funds by task and if the funds are sufficient for FY87 work. Under separate cover I have sent a letter authorizing the three studies discussed in our meeting of September 30, 1986, these should also be included in the appropriate Tasks prior to determining task funding needs.

2. Under Task III, you indicate that work continued on Chapter III (Thermomechanical Effects) of the Probability Techniques Report. I understood that Chapter III and Cornell's chapter were complete and ready to be transmitted to the NRC, while the Geochemistry chapter would be ready in December. Please provide the status of these three chapters in the next monthly report.

3. As a result of the review of codes for integration task, Dr. Hunter had indicated that many of these codes were not documented as required by NRC guidelines. Upon completion of her review Dr. Hunter committed to provide the NRC a list of the code and their status with regard to the required documentation. The NRC is still interested in receiving this information and would like to know the status of this information in the next monthly report.

4. In the September monthly report under Task I, you indicated that the interim report on the development of an integrated licensing assessment methodology would be submitted with the October monthly report. Since this document was not included in the October report, please indicate in your next report when the interim report will be submitted.

5. In my comments in the August monthly report I requested by November 1, 1986 the status of your re-review of the Y. Kim report and the expected date your review would be submitted. Please provide the status of the re-review of the Y. Kim's report and the expected completion date in the next monthly report.

6. In my comments on the August report I requested to be notified by November 1, 1986 on when NRC would receive the additional information on reduced probability spaces and the normalization process. Please provide the status of this information and the expected completion date in the next monthly report.

7. In my comments on the July monthly report I requested information on the affect of the change in project managers would have on the Task I schedule. Since the entire project is now under yourself and R. Guzowski, please expand your response to include all Tasks. Please submit this information with the next monthly report.

The action taken by this letter is to be considered within the scope of the current contract (FIN-A1165). No change to cost or delivery of contracted product are authorized. Please notify me immediately if you believe this letter would result in cost or delivery of contracted products.

Sincerely,

Original Signed By:
