SUBJECT: INFORMAL DOE OF NRC Letter to W. Kiel; BLM & CERT DOCUMENTS; MENU OF DISCUSSION ITEMS

SUMMARY

NRC Letter to W. Kiel – A. Lassila was informed that NRC has recently received info from the BLM (mineral leasing) and from C. Gerard of CERT (BWIP area faulting) that was being sent to W. Kiel of WPPSS. This info is (will be) of interest to BWIP. Mr. Olson is being sent a copy of this letter (with attachments). A. Lassila was informed that NRC is preparing other memos dealing with the above matters. DOE will be provided copies of these memos and will be sent a copy of the CERT cross-section upon receipt from CERT.

Other Items Brought upon for Future Discussion with DOE/RHO:

(1) AEC (BATTELLE) REPORT OF 1968 presenting an interpretation of the Standard Oil of California Rattlesnake Hills well and the thick coal sequences noted between depths of 1,600' and 5,000'. Mr. Lassila indicated that Steve Reidel of RHO has discussed this hole to some degree in several papers.

(2) Geophysical logs – DOE was requested to identify (and later provide copies of) geophysical logs (by type, hole intervals, and if digitized) of boreholes shown on

– continued –

ACTION REQUIRED

Providing DOE, when received from CERT, a copy of the geologic cross section at BWIP. Also provide, when completed, copies of NMSS documents to DOE.

SUBJECT: -See p. 1-

SUMMARY: DOE's Borehole Status Chart & Location Map.

(3) Rattlesnake Hills Well - DOE was asked to identify reports, work, etc., it has performed, or knows of, relating to Standard Oil's Rattlesnake Hills well.

(4) CDIT (Curtis Lanard?) geologic cross section - DOE was asked if it had seen this cross-section. The answer was no. NRC will provide a copy of this cross section to DOE. NRC informed DOE that Curtis Lanard will be providing no additional reports on this subject since he has been reassigned.

(5) NUWSI Weekly Highlights - DOE was asked to consider providing a report similar to this for the BWIP-related activities.

(6) USGS Refraction Line - DOE tells NRC that nothing has been produced on this subject besides the 1985 Rohay, Glover, Malone SSA abstract (RHO-BW-SA-475P). Nothing beyond this is being presently considered.

(7) Fracture Frequency - DOE was asked to identify studies they have undertaken relating to horizontal vs. vertical fracture frequency

SUMMARY

as determined for the Cohasset and underlying/overlying units. Were deviated holes used – being considered, planned, etc. How will this issue be addressed?

(b) DOE Staff Geologist – DOE (Art Lassila) informed NRC that the new DOE geologist (Darwin Maryaniemi) is scheduled to report to duty on Monday, October 27. Art Lassila will pass on these matters to Darwin M. who will then call me and set up a conference call with RHO/DOE persons.
