Phil and Eddie,

Eddie, and Phil

We would like to schedule a phone call to discuss the two issues below. In addition, as I informed Eddie yesterday, we believe that the following RAI responses should include a revision to the FSAR: 2.3.1-8, 2.3.3-3, 2.3.1-9, and 2.3.1-10.

Please let me know when you can support a phone call to discuss these items. NRC's priority is to discuss the two issues below first, because we need to determine as soon as possible if additional RAIs are needed.

Sincerely,

Joe Sebrosky
Senior Project Manager

Subject: Bellefonte Issues

Joe,
Have two issues for TVA.

1. Two-year Met Data File
The 2-year Met data file is only partially readable. Neither Leta nor I were able to successfully use it.
More specifically it's not a totally clean file. Appears to have bad or incorrect characters at different places in the file.
Can we get TVA to take a look at it clean it up and send us another file?

2. SACTI Output
Was not able to reproduce the plume length information in the tables provided in the FSAR.
Could we get a conference call Thurs or Friday to discuss technique used?

Thanks,
Tom
