Eddie,

Please see Jeff's comment below. If that isn't enough, we can schedule another phone call.

Subject: RE: carbohydrazide

Sue,

Can BLN supply a reference for the chemical formula of carbohydrazine? Carbohydrazide is the chemical identified in the EPRI PWR Secondary Water Chemistry Guidelines, as opposed to "carbohydrazine." I did find some references to "carbohydrazine" as an oxygen scavenger on the internet, but did not come up with a chemical formula.

Maybe a brief conference call would be helpful.

Thanks,

Jeff

Jeff,

Please see BLN's response below to your request to change the name of that one chemical. They are suggesting carbohydrazine instead of carbohydrazide. Is this acceptable to you?

If it is not, then we need to schedule a phone call.

Subject: RE: Errata change

We have confirmed that it should say "carbohydrazine" instead of either "carbohydrazide" or "carbohydride" and we will make this change in the next revision to the application.
Let me know if you need more.

Thanks,
Eddie R. Grant

Eddie,

In section 10.4.7.2.1, BLN COL 10.4-2 of the FSAR, the staff believes you intended to say "carbohydrazide" instead of "carbohydride".

" The oxygen scavenger agent is hydrazine and the pH control agent is ammonia/monoethylamine. During shutdown conditions, carbohydride may be used in place of hydrazine "

Please confirm you can make this change in the next revision to the application
