Eden Prairie, MN 55344-3523

SUBJECT: Close-Out of Your Expired NRC Radioactive Materials License

On June 15, 2004, you contacted the U.S. Nuclear Regulatory Commission and indicated that you wished to terminate your NRC radioactive materials license. The information you provided required review by both the NRC Region III Materials Licensing Branch and Decommissioning Branch. As a result of these reviews, NRC prepared an Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) in support of the proposed license termination. The Notice of Availability of the EA and FONSI were published in the Federal Register on September 22, 2004, (Vol. 69, No. 183).

Therefore, the staff has concluded that: 1) all licensable radioactive material has been removed from your facility, and 2) residual radioactive material attributable to licensed activities does not exceed current NRC criteria. However, during these reviews the expiration date of your license has elapsed. As such, your license could no longer be terminated and has been retired.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. Your facility is suitable for unrestricted use and NRC license number 22-20307-01 for your facility in Eden Prairie, Minnesota is hereby retired.

If you have any questions or require clarification on any of the information stated above, please contact James Mullauer at (630) 829-9873.

Sincerely,

Patricia P. Pelke
Chief, Materials Licensing Branch
