All,

I am forwarding this information for Norman Hopkins for the Levy project. It expands on an earlier email regarding Hydrology that I sent to you several weeks ago. Please take a look at the information to see if it relevant to the EIS.

Thanks,

Doug

Douglas,

I have added information to the Foundation's website at www.amyhrf.org

Go to Education Section - Coastal Rivers - Crystal River (under Tributary Flows). Progress Energy released a site map showing E - W piezometric flows across the site. Where such flows intersect with a southward flowing conduit to the west, as suggested by the research , it would change direction to the south.

Other pages showing similar research are at:

Education Section - Aquifers - Geology and, - Citrus County - Fractures sets Example

I hope this helps. Norn
