US Nuclear Regulatory Com ATTN: Rulemakings and Adjudications Staf
Secretary
Washington, DC 20555-0001

Dear US Nuclear Regulatory Com ATTN: Rulemakings and Adjudications Staf:

I am writing in support of the Petition for Rulemaking filed by the Committee to Bridge the Gap to the US Nuclear Regulatory Commission for "Upgrading the Design Basis Threat Regulations for Protection Against Terrorist Attacks on Nuclear Reactors" (posted in the Federal Register on November 8, 2004, Volume 69, Number 215).

DOCKETED
USNRC

February 3, 2005 (11:53am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Graham Allison soberly discusses the problem of nuclear power plant vulnerabilities:

"The American Airlines flight that struck the North Tower of the World Trade Center could just as readily have hit the Indian Point nuclear power plant, forth miles north of Times Square...

I urgently request that the NRC upgrade the Design Basis Threat (DBT) for US nuclear power stations.

Since our president has seen fit to unilaterally kill thousands and thousands of Iraqi civilians, and now makes noises about Iran, in effect arousing hatred, suspicion and fear in all the Middle East, and making our country a more sought after target of attack, please upgradie the Design Basis Threat for US nuclear power stations and take immediate steps to safeguard all nuclear sites.

Sincerely,

Tobi Dragert
