Subject: Amendment Request To License **#45-25221-01MD** (03032974) - **Mail Control 136276**

Dear Mr. Thompson,

As previously requested in a letter dated January 6, 2005, Eastern Isotopes would like to clarify and amend the aforementioned license. You have since asked via an email dated March 29, 2005:

1. Your license had previously listed several Radiation Safety Officers (RSO), however, NRC only recognizes one RSO as responsible for a licensed program. Duties of the RSO may be delegated but only one RSO is responsible and listed on the license. Please confirm that you are the RSO to be listed.

Joe Harless will be the singular **Corporate NRC Radiation Safety Officer.** Remove all others. The request to add James Kostka is rescinded.

2. Your license had previously included research and development under Condition 9.A. through E. This is not normally part of a nuclear pharmacy license authorization. Please clarify and /or indicate if this should be removed from license authorizations.

There will be no actual research and development using NRC licensed materials. However NRC licensed materials will be used in the R&D lab to calibrate instruments. **R&D clause in 9.A. can be removed.**

3. Subitem 7.J. of your license indicates the form any, however, it seems sealed sources should be the correct form. Please clarify.

10 CFR 35.1000 – If your interpretation of 35.1000 is that 35.100 only applies to sealed sources, then please replace 'any' with 'sealed sources'.

Please clarify that the key contact mailing address for Eastern Isotopes should read "Joe Harless c/o Jim Kostka", to assure in the future a timely review of items mailed to the Sterling facility.

Thank you for your attention to this matter. If you have any questions, please contact me at (704) 226-8100.

Sincerely,

C. Joseph Harless

C. Joseph Harless, CNMT, Vice President, General Operations & Corporate RSO, Eastern Isotopes, Inc.
