I most likely won't be available during the call today. I had some car trouble this morning. However, it doesn't appear that I have anything new to add. We are still following up on the RAIs and preparing the DEIS. I'm working to get the Audit Summary report through concurrence. We are making some changes to be more consistant with previous audit reports.

Mike W.

Thanks Steve. I have attached my proposed topics for the conference call as well.

Note that I have added the need for a potential conference call on RAI #27, question 03.06.02-1. The question addresses site-specific pipe break evaluations. As noted in the question, RG 1.206 requires the applicant to provide a schedule for such detailed engineering information. Luminant intends to respond to the question with a comment to a schedule regarding when the information will be available but the question implies that a license condition should be proposed. Luminant would like to understand the criteria being used to suggest the need for a license condition.

If we can discuss on this morning's call, that would be great. If not, maybe we can discuss a date and time for a conference call.

Thanks,

D. R. Woodlan
