JUL 28 1969

Docket No. 50-286

R. S. Boyd, A/D for Reactor Projects, DRL
THRU: Daniel R. Muller, Chief, Reactor Project Branch #1, DRL

INDIAN POINT UNIT NO. 3 EXEMPTION REQUEST

By letter dated July 2, 1969, the Consolidated Edison Company of New York, Inc., requested an exemption from provisions of 10 CFR 50.10(b) which would permit certain work in the containment building as well as installation of the service water piping between the service water valve pit and the base of the primary auxiliary building, construction of the foundation of the primary auxiliary building, construction of the foundations of the fuel storage building, and construction of the waste tank pit to elevation 54 feet. This exemption request was received on July 11, 1969. On July 14, 1969, examination of the request indicated that the applicant had not attached the proper drawings to the request but had instead attached drawings unrelated to the structures for which the exemption is sought. I contacted Mr. Lex Larson, LeBoeuf, Lamb, Leiby and MacRae, and informed him that this was the case. Mr. Larson indicated that he would attempt to correct this situation. On July 16, 1969, Mr. Henry Nichol of LeBoeuf, Lamb, Leiby and MacRae contacted me and asked that the improper drawings be returned and indicated that he would provide correct drawings to support the exemption request. These were delivered by Mr. Nichol on July 16.
