Mr. Jay Herrington
Field Supervisor
U.S. Fish and Wildlife Service
Southeast Region 4
176 Croghan Spur Road
Suite 200
Charleston, SC 29407-7558

SUBJECT: REQUEST FOR COMMENTS ON THE DRAFT ENVIRONMENTAL IMPACT STATEMENT AND BIOLOGICAL ASSESSMENT RELATED TO THE REVIEW OF THE COMBINED LICENSE APPLICATION FOR VIRGIL C. SUMMER NUCLEAR STATION, UNITS 2 AND 3

Dear Mr. Herrington:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing an application submitted by the South Carolina Electric and Gas Company (SCE&G), acting for itself and as an agent for South Carolina Public Service Authority (also referred to as Santee Cooper) for two combined licenses (COLs) to construct and operate two new nuclear units at its Virgil C. Summer Nuclear Station (VCSNS) site in Fairfield County, South Carolina. As part of its review of the proposed action, the NRC staff have prepared a draft environmental impact statement (DEIS) and biological assessment (BA), which are enclosed. The DEIS includes analyses of relevant environmental issues and documents the NRC staff's determination regarding the suitability of the proposed site for the construction and operation of two new nuclear units. The U.S. Army Corps of Engineers (USACE), Charleston District, is a cooperating agency on the DEIS.

The NRC and USACE staff have not identified listed species or critical habitats under the Federal Endangered Species Act (ESA) of 1973, that could potentially be affected by activities proposed on the project site. However, the staff have identified 14 species listed as threatened or endangered under ESA, as well as two candidate species, potentially occurring in areas that may be traversed by a future route selection process for six transmission lines proposed for development as part of the action. The staff have determined that the transmission lines, depending on the exact routes ultimately selected, may affect but are not likely to adversely affect the following 13 of the 14 threatened or endangered species potentially present in areas traversed by possible routes: wood stork (*Mycteria americana*), red-cockaded woodpecker (*Picoides borealis*), flatwoods salamander (*Ambystoma cingulatum*), Carolina heelspitter (*Lasmigona decorata*), pool sprite (*Amphianthus pusillus*), smooth coneflower (*Echinacea laevigata*), Schweinitz's sunflower (*Helianthus schweinitz*), black-spored quillwort (*Isoetes melanospora*), pondberry (*Lindera melissifolia*), rough-leaved loosestrife (*Lysimachia asperulifolia*), Canby's dropwort (*Oxypolis canbyi*), harperella (*Ptilimnium nodosum*), and relict trillium (*Trillium reliquum*). The staff concluded that there should be no affect on the fourteenth species, piping plover (*Charadrius melodus*). The transmission lines could also potentially affect but not adversely affect two candidate species: Georgia aster (*Aster georgianus*) and bog asphodel (*Narthecium americanum*).

The NRC and USACE staff's conclusion regarding the potential for adverse effects relies on an assumption that the applicant will use flexibility when selecting the exact future routes for the transmission lines.

To fulfill consultation requirements as required by the ESA and Fish and Wildlife Coordination Act (FWCA), please provide any information and comments you may have on the enclosed DEIS and BA by July 6, 2010. Comments should be submitted by mail to the Chief, Rules, Announcements, and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop TWB-05-B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-001, or via e-mail to Summer.COLEIS@nrc.gov.

The NRC and USACE staff plan to hold two public meetings to discuss the analysis and results in the DEIS on Thursday, May 27, 2010, at the White Hall AME Church, 8594 State Highway 215 South, Jenkinsville, South Carolina. The first meeting will convene at 12:00 p.m. and will continue until 4:00 p.m., as necessary. The second meeting will convene at 6:00 p.m. and will continue until 10:00 p.m., as necessary. You and your staff are invited to attend.

If you have any questions or require additional information, please contact Ms. Patricia Vokoun, Environmental Project Manager, by phone at 301-415-3470, or via e-mail at Patricia.Vokoun@nrc.gov.

Sincerely,

/RA/

Ryan Whited, Chief
Environmental Projects Branch 2
Division of Site and Environmental Reviews
Office of New Reactors

Docket Nos.: 52-027 and 52-028
