**Pages:** 2

Mr. Stelting,

We have performed a review of your letter dated April 19, 2006. Attached are the deficiencies we found, as you yourself have pointed out in your cover letter. **Please respond to this fax within 60 days of receipt**. You may fax us your response in order to expedite this request, as long as the faxed letter contains an original signature. Our fax number is (817) 860-8263. If you have any questions regarding this fax, please call me at (817) 860-8252. When responding to this fax, please include your license number and mail control number located at the top of this page. Thank you.

Anthony D. Gaines, Senior Health Physicist
Nuclear Materials Inspection Branch

1. Provide a copy of a signed agreement with the well owner that details what actions the owner and you will take to not compromise the integrity of the source. The agreement should also state that the well owner will contact you prior to any major work performed on the well so that you may decide whether the operation would endanger the source before the work is performed and then if it would, that you will either resume tool recovery operations or complete abandonment before the work is performed.

2. Provide documentation that the federal authority (MMS) that regulates oil and gas well activities concurs that the source can be temporarily stored down hole while the well is still in production.
