Ricky,

It has been more than 30 days since I sent you the letter requesting more information. I have not yet received a response. In addition, I must do a pre-licensing visit at your facilities with you.

This request for a new license is nearly 60 days old, and I am required to complete it within 90 days. If you think you cannot provide me with sufficient information in time, I will void this action, and you can re-submit the request for a new license, with the additional information, at a later time.

Please let me know when I can expect your response. Also, let me know when we can meet for a pre-licensing visit. At this time, I cannot be available on the following dates: August 13, 16, 17, 23 and 27.

Betsy

Thank you for the response Betsy, I believe we will incorporate the RSO training into our plan

Ricky

Someone needs to have enough radiation safety knowledge to 1) answer questions from non-radiation workers who may have concerns and 2) respond in the event of an emergency (a warehouse fire, for example; or someone opening a package who shouldn't be doing that), 3) respond to damaged packages (crushed , dropped, returned, etc) and 4) understand the regulatory requirements and fulfill them. So the RSO training would be a very good thing.

Hello Ms Ullrich,

We are currently in the process of gathering the necessary information for the license application that was submitted to the Nuclear Regulatory Commission on June 8, 2010. One area of question that we are currently addressing is the requirements for the Radiation Safety Officer (RSO). The assumption that we are going on is that at a minimum the RSO will need to have the Radiation Safety Officer training. Can you advise if this is necessary. As we look further into the requirements, all of the radioactive devices in this facility come in sealed, they are stored in a caged area and are shipped sealed. As we gather more information, we will have this forwarded on to your office.

Best regards
Ricky Williams
