RE: Amendment to License No. 37-05125-01 03003045

To whom it may concern:

We would like to amend our license to assign a different radiologist to become the new Radiation Safety Officer (RSO) for this institution. Raymond A Halt, M.D. will resign from this position as of October 31, 2006.

The appointed radiologist is Floyd Hyatt, M.D. He meets the criteria for Radiation Safety Officer according to 10 CFR 35.50. Enclosed please find a written certification attesting to his qualifications from the outgoing RSO.

Should you need further information, please contact me at (814) 452-5416.

Thank you.

Sincerely,

Matthew Shebel

Documentation of Training of Floyd Hyatt, MD for Assumption of Radiation Officer Duties

Floyd Hyatt, MD already is an authorized user at Saint Vincent Health Center and has been previously qualified for use of nuclides under 35.100; 35.200; 35.300; 35.500; as well as invitro studies. Dr. Hyatt has received additional training in order to allow him to act as my representative at Saint Vincent Health Center performing Radiation Safety Officer duties during times of my absence for the last 15 years. He has been precepted in radiation physics, instrumentation, radiation protection, patient and health care counseling, calculation of exposures, radiation biology, and radiation dosimetry. He has also been the individual responsible in my absence for any radiation concerns regarding receiving and returning radionuclides, interaction with the physicists who performs measurements and surveys of the department, securing and controlling byproduct material. He has been involved in preventing errors of misadministration and corrective actions taken to avoid/minimize any chance of future misadministrations involving controlled substances. He is active in our ALARA program and has been prepared for consultant duties should there be emergency situations involving byproduct material. He has been gradually assuming greater responsibilities regarding oversight of radiation safety officer duties and is now considered capable of functioning as the radiation safety officer for Saint Vincent Health Center.

Sincerely,

Raymond Halt MD
