Scott/Tom:

The NRC staff has reviewed your supplemental response dated September 29, 2010 to the Callaway Plant - Union Electric Company's request for changes to Technical Specification 3.3.2, "Engineered Safety Feature Actuation System (ESFAS) Instrumentation." Based on that review, the NRC staff has identified a need for additional information as outlined in the attached request for additional information (RAI).

Please review the RAI, and feel free to contact me if you would like to discuss.

Thank you for your attention in this matter,
Jim
