The documents submitted to the Document Control Desk on 10/26/06 cannot be processed as submitted due to the following:

1. Mixed data and text files on same disk.

Resolution: Change .txt files to .in files. The ADAMS folks don't like .txt files.

2. .zip files on one disk - .zip files are not acceptable for ADAMS processing.

Resolution: Expand the .zip files and place in an individual folder.

3. Some unknown file types, e.g., .in

Resolution: These are fine as long as they are identified in the submittal letter as input files.

4. Documents submitted on CD require a transmittal letter from the submitter/utility.

Resolution: Re-submit the CDs under a transmittal letter which identifies the CDs as containing input files or GIS files and which contains the docket number (52-011).

5. No identification (utility name, docket number, submitter's name, etc.) is included. We have no idea how to identify these documents for the ADAMS profiles.

Resolution: See item #5.

6. In addition, all were submitted on the wrong form - they were submitted on a scanning request, which cannot be used because they're not going to be scanned. They should be submitted under a cover letter from the submitter.

Resolution: NRC will address this issue.

The disks are being returned to you via the internal mail. If you have any questions or need assistance, please call Kenny Nguyen, 415-2046, here at the Document Control Desk.
