Dear NRC

my Name is Rudolph williams, I have been Doing my Best to get In touch with you. But I Do Believe that some Companys have Done their Best to Hide me from you. Right Down to N.C. News & Observer, I have written them (N&O) 5 strait times trying to get them to put me in touch with the right People. I have Invented a Power Source that is Inexpensive and 95% Safe to the Consumer & the world. It is a Fully Self Sustaining Electrical power / Generator, this Invention will power Anything & Everything Electrical that we have created thus Far. But I Believe for the Sake of the Companys Losing out on millons of Dollars they have made up their minds to try and Hide this Discovery from you & the Rest of the World. So I have been Fighting against all odds to get National Attention to what I have named I AM Coil. This Engine / Generator will change the way we supply Power to our Homes offices & Business. Because instead of wires running for Miles & miles, We will Be able to Place one Small I am coil (3 feet Wide x 4 feet High x 7 feet Long) on the Building or home Lot of Land in which it sits on. And I need not tell you How great of a Benefit that will Be In Storms, Floods, & Summer. This is a great Invention and it Should be put In to Full Production Starting Now. If you truely Do Care about our safety & making the world a great Place to Live for our kids, then I will see you at this Prison No Later than 3 Days after you have recieved this Letter. Then I will take you through the whole System of the I AM Coil, And Explain to you How it works from top to Bottom. And when I finish you will know for yourself that it truely works and Works Good, Forget about me Being in Prison & Look at what I have Invented, that is the most Important Subject here. I stay off to myself & I Don't let to many People know what I have Created In Here, Because it is a Multi Billon Dollar Invention. And Like my Grand Father use to say talk is cheap, Action is More, So Come & See this Invention for yourself. I will Be waiting for you to show Up
