Dave

With respect to the request to post digital elevation maps (DEM) on the online reference portal, generally, the water modeling software (HEC-RAS, HMS etc) defines cross-sections and the watershed boundaries from DEMs. It makes the staff's review more efficient if access to this information could be granted. As a clarification, these are the data models that are used to develop input to many of the surface water models.

Let me know if further clarification is needed.

Subject: Discussion Items

Janelle – Please call me when you have a chance, I would like to discuss a couple of ongoing items: status of staff review man-hour estimate, clarification of request to post digital elevation maps, status of information needs for audit, and any special dietary needs for the audit.

Thanks.
Dave Distel
