Robert N. Meyer
Professional Reactor Operator Society
E-mail: robt.meyer@gmail.com

Dear Mr. Meyer:

I am responding to your letter of October 16, 2009, in which you enclosed a petition for rulemaking (PRM) on behalf of the Professional Reactor Operator Society, asking the U.S. Nuclear Regulatory Commission (NRC) to amend Title 10 of the *Code of Federal Regulations* (10 CFR) Part 26, "Fitness-for-Duty Programs." The petition was docketed as PRM-26-3. The NRC published a notice of receipt and request for public comment on PRM-26-3 in the *Federal Register*. The public comment period closed on February 10, 2010.

The NRC received four letters with public comments on the petition: one from a shift manager at a nuclear power plant, one from a senior reactor operator, one from the Nuclear Energy Institute, and one from a private citizen.

The NRC determined that the issues raised in PRM-26-3 are appropriate for consideration in the planned "Quality Control/Quality Verification" rulemaking. This rulemaking will also address the requests of two additional PRMs related to the fatigue management provisions of 10 CFR Part 26.

The enclosed *Federal Register* notice about PRM-26-3 is being transmitted to the Office of the Federal Register for publication. This PRM docket is considered closed upon publication of the *Federal Register* notice.

You can monitor further NRC action on the issues raised by the petition in the "Quality Control/Quality Verification" rulemaking at the Federal rulemaking Web site, *http://www.regulations.gov,* by searching on the rulemaking Docket ID: NRC-2009-0090. The NRC also tracks all rulemaking actions at *http://www.nrc.gov/reading-rm/doc-collections/rulemaking-ruleforum/.*

Sincerely,

/RA by Martin J. Virgilio for/

R. W. Borchardt
