
CIMARRON FACILITY

PLATE 2

CIMARRON FACILITY
PROPOSED GROUNDWATER PHASE AREAS

PHASE I	- Area hydrologically isolated. No assessment needed.
PHASE II	- Area assessed. Groundwater not impacted above background levels.
PHASE III a	- Area assessed. No further monitoring should be needed. Groundwater is above background levels but below release criteria. Wells that have been monitored more than eight consecutive intervals satisfy the intent of license condition 27(b).
PHASE III b	- Area assessed. Continue monitoring. Groundwater may or may not have exceeded release criteria but no longer exceeds criteria. Currently less than eight consecutive sets of historical data.
PHASE IV	- Area assessed. Groundwater exceeds release criteria. Evaluating remedial options.
