Comments for NRC,

In response to your presentation on the environmental impact on Feb 27, 2007 in Montpelier, VT, I must conclude that not enough is known for you to adequately relicense this aging plant. For one, the waste storage ~~capa~~ facility at the Vermont Yankee plant is at capacity! The plant, when first constructed, was due to close this year because of the issue of waste. Until there is a definitive plan, I must agree with all of those who voiced opposition to this plant and all nuclear power plants continuing to generate more waste. You must as ~~a~~ the regulatory agency

look at the alternatives seriously and ~~ea~~ face the problem of spent fuel waste by stopping the ~~ee~~ increased production of waste.

Thank you,

from the hills of Vermont

Jessica Cultity
