Dear Mr. Bartlett:

This refers to your license amendment request. Enclosed with this letter is the amended license.

In the future please have a management representative sign the amendment request rather than Mr. Andrew Hohmann.

The license amendment number being issued is amendment number 3. The previous license issued on December 6, 2002 was incorrectly identified as amendment number 3 and is really amendment number 2. The letter dated December 6, 2002, which issued the license denotes the amendment number as 2. A corrected copy is not issued as the license is being amended at this time. Sorry for any inconvenience that this may have caused.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Industrial, and Academic Uses of Nuclear Material;** then **Toolkit Index Page.** Or you may obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-888-293-6498.
