SUMMARY [redacted]

NRC: Dan Forsyth, Jennie Rankin
Naval Reactors: Mike Schultes, representatives from KAPL.

The staff is in process of issuing a Request for Additional Information (RAI) regarding the 688-Class Reactor Compartment Disposal Package application. A draft of the RAIs were sent to the applicant a nd this telephone conferences was scheduled to discuss the potential RAIs.

The staff and applicant discussed the possible need for supplemental shielding and how to incorporate that into the design of the package. The staff and applicant agree that additional information needs to be incorporated into the application to support the use of the supplemental shielding (e.g. weight, location, etc).

The staff requested in a RAI, some additional dimensions of the internal components needed to aid in the shielding analysis. Naval Reactors requested that specific dimensions needed be noted on a drawing/sketch from the SAR. This information will be transferred to Naval Reactors over the secure fax.

Lastly, the staff proposed a RAI response submittal date of October 28, 2011 pending a RAI issue date of September 16, 2011. Naval Reactors did not know if the date was achievable due to the depth of the RAIs and current workload. They will follow up with the PM by the following week.
