Tim,

I got your VM too late to respond before you left. I apologize for that. In response to your question, there will be a posterboard table for License Renewal. I verified this after hearing you question today. The full list of posterboard tables follows:

Spent Fuel Storage
License Renewal
NRC Oversight
Role of the NRC
Emergency Preparedness
Groundwater Contamination

The License Renewal table will be there to address the generic process. Entergy has not yet submitted their application for IP's license renewal, so we won't be going into any specifics there. However, they have publicly stated that they will be submitting the application soon. This meeting provides us with an additional opportunity to inform the public about how we go about evaluating a site for a license extension.

I will make sure that our staff notifies Entergy of the subjects that we will cover during next week's meeting.

Marjey

** High Priority **

Hello Again,
During discussions on planning for this meeting, I got the impression that there would be a poster session on relicensing at the 4/26 IP public meeting.
I had passed that info on to our staff responsible for that issue (the Water Quality Certification requirement) and they are starting to put together material on that issue to present the limited state role.

I just heard from Entergy that there would not be a poster session on relicensing, and the only topics to be covered would be groundwater issues, dry cask storage, and sirens. Could you clarify this for us?
Possibly send a final list of topics to be covered?
If that topic is not going to be covered after all I want them to know that so they don't spend any more time or resources preparing for it.

Please e-mail any info to me and to Chris Hogan cmhogan@gw.dec.state.ny.us

Thanks,
