CRCPD's Committee on Radioactive Waste Management

Conference of Radiation Control Program Directors, Inc.
A Partnership Dedicated to Radiation Protection

May 30, 2003

Mr. Douglas W. Akers
Senior Advisory Scientist
Idaho National Engineering Labs
P.O. Box 1625
MS 2114
Idaho Falls, ID 83415

Dear Mr. Akers:

This is in reference to two separate technical evaluations conducted on behalf of the Idaho National Engineering and Environmental Laboratory (INEEL) by the Conference of Radiation Control Program Director's (CRCPD) E-5 Committee on Waste Management. With regard to INEEL's low-level radioactive waste form qualification testing for the Diversified Technologies Polymer Waste Form, the committee concurs that this waste form as tested meets all the applicable NRC Branch Technical Position Test requirements. In addition, the committee also concurs with INEEL's qualification testing results for ATG's (now NUKEM) Macro-encapsulation of Cartridge Filters Waste Form process concluding that the waste form also meets all NRC Branch Technical Position requirements.

Please be advised that this Committees concurrence does not abrogate the authority of States or Federal facilities with regulatory authority concerning the acceptance of waste forms at their respective disposal facilities.

If you have any questions, please feel free to contact me.

Sincerely,

Mark A. Yeager

Mark A. Yeager, Chairperson
CRCPD E-5 Committee on Radioactive
Waste Management
