Subject: Generic EIS for Uranium Mill Recovery public scoping comments
cc: <dboyer@libertystaruranium.com>,<dcram@libertystaruranium.com>,<emurdock@libertystaruranium.com>,<jbriscoe@libertystaruranium.com>,"Harold E Gill" <Harold.E.Gill@us.mwhglobal.com>

Thanks so much Mr. Park,
If there will be no other public scoping meetings, I would like to make sure our comments are recorded via this email. Please return receipt.

Our client, Liberty Star Uranium & Metals Corp, is beginning their environmental due diligence. They have a large set of claims in the Arizona Strip area that they are currently drilling and we expect that the mining of any deposit in northern Arizona would be a connnected action associated with the building of a new mill.

Liberty Star is also considering possbily putting in a uranium processing mill at Fredonia, Arizona. I would like to make sure that the Fredonia area is included in the project area for the Generic EIS. If the EIS is so generic so as to preclude citing exact locations then, if the general Fredonia area can be included, we would be much obliged.

We understand that the mill might need an Aquifer Protection Permit and possibly an AZPDES permit from the State of Arizona. We are interested of course in effects to groundwater and have little information as to depths to groundwater and surface and groundwater water quality in the AZ Strip and Fredonia area. We ask that the GEIS consider groundwater depths and water quality in the Fredonia area.

Also, if an email flyer alert system can be set up so as to keep up to date with the GEIS process that would be very helpful. Maybe we could sign up via the website. Thanks so much for your direction in this endeavor.

Best regards,

Rebecca A. Miller, R.G.

Subject: Re: NRC website for GEIS for Uranium Mill Recovery

Ms. Miller,
I wanted to pass along the url for the NRC's website on the uranium recovery GEIS. Currently the site provides background on the project, including the slides and transcripts from the three public scoping meetings that were held. In January 2008, we expect to add the summary report from the scoping process.

Good afternoon,
I would like to receive as soon as possible a hardcopy of the Generic EIS for Uranium Mill Recovery so that I might comment on it before the deadline date of November 30, 2007. Please respond with the direct URL or a hardcopy as soon as possible

Best regards,

Rebecca A. Miller, R.G.
