Subject: Uranium Recovery GEIS

To Whom It May Concern:
I am responding to the U.S. Nuclear Regulatory Commission's Federal Register notice dated July 24, 2007 regarding the scope of the proposed Generic Environmental Impact Statement ("GEIS") for in situ leach ("ISL") uranium mining.

I write to oppose a GEIS. The reasons are many. I live near the Navajo Reservation and I have personally seen the devastating effects on the environment and the ill health effects resulting in cancer and death. As a citizen and physician, this process must be reviewed, damage to precious aquafers and toxic risks to workers and surrounding communities is not acceptable.

Sincerely,

Marcus Higi
