Re: Cancellation of Materials License
NRC License No. 37-31422-01 03038383

To Whom It May Concern:

ISM Services Incorporated is closing their Technical Services group effective 16MAR15. This service group includes the materials testing services that utilized the Troxler Electronic Laboratories Model 3411 portable gauges that ISM is licensed for. ISM's complete nuclear inventory – three (3) gauges – has been transferred to North East Technical Services on 10MAR15 for disposal in accordance with regulatory requirements – see enclosed transfer sheet. Each of ISM's gauges were accounted for and included in the transfer. ISM does not now possess any nuclear inventory. A final survey of the storage area found only background readings of less than 0.02 mR/hr.

Please cancel ISM's Materials License and close them out in your system. ISM will submit any required paperwork and fees should they decide to resume a regulated service line.

Do not hesitate to contact Christopher Grose, ISM VP of Operations, at 703.939.0587 should there be any questions or need for additional information.

Respectfully,

Matthew W Anderson, PE, RSO
