Subject: Comments on the draft EIS for the Vogtle Early Site Permit

Ladies and Gentlemen:

I am a supporter of nuclear energy. I think it is one of the best of our currently limited alternatives for powering the nation. This is not, however, the right time to be issuing water withdrawal permits to anyone in Georgia. We have been engaged for the past two years in an extensive government and public development process which is mandated by statute to lead to the adoption of a new Statewide Water Plan in the 2008 session of the Georgia General Assembly. Please let us finalize and conduct the research and planning that is to be mandated by that plan before approving a massive water withdrawal such as will be required to operate two now generators at Plant Vogtle.

Thank you for this consideration of Georgia's water resources that we are learning every day are scarce and precious.
