Attachments: [External_Sender] RE: License Renewal to License Number 21-29258-01

Good Evening Sal:

Forgive me in the delay of responding to you but yes, it appears you have notified us of your pending removal and disposal of the gauges when you submitted your renewal application dated January 25, 2016. In addition, I noted our understanding of this fact in the 1st paragraph of the materials license cover letter dated July 22, 2016, transmitting your renewal license. Therefore, License Conditions 12 and 20 appear to be satisfied.

As a courtesy, please keep us informed via signed and dated letter of the progress of removing the gauges successfully and submit NRC Form 314 (http://www.nrc.gov/reading-rm/doc-collections/forms/) accordingly when you decide to terminate your license.

Please do not hesitate to contact me at the phone numbers and/or email address listed below if I can be of further assistance.

Enjoy the rest of your day and weekend!

Warmest Regards,

Ms. Jacqueline "Jackie" D. Cook

Hi Jackie,

Hoping all is well; this email is a follow-up to a message I just left on your voice messaging system.

As we are getting closer to executing the removal, I would like to be sure that all license conditions have been met with respect to written approval of the USNRC. As it stands right now, we expect to mobilize to site on Friday August 26, 2016. If you could please confirm, it will, of course, be appreciated. Your guidance has been key to the success of this process, and has been appreciated.

Again, thank you.

Sal Delisi

Subject: RE: License Renewal to License Number 21-29258-01

Good Morning, Ms. Cook.

With respect to Materials License 21-29258-01 Condition 12, et. al, regarding prior written approval from the USNRC regarding activities related to source removal, could you please confirm such conditions have been met? If not, please advise what steps would be required to complete this action. I appreciate the reciprocity issues are separate, and they will be managed accordingly. As you can imagine, I want to make sure there are no loose ends from the Materials License perspective when it comes time for the actual removal.

Thank you again...Sal
