Dr. Shirley Ann Jackson
US NRC
Washington, DC 20555 0001

Sept 23 1995

Dear Dr Jackson,

Please act to prevent Louisiana Energy Services from constructing a uranium enrichment plant near Shreveport, La.

It is said the plant would produce 4000 tons of radioactive toxic waste per yr. No means of permanent, safe disposal ~~for~~ of this waste exists. If stored on site, it could contaminate the air, water, and earth.

Why is this facility needed? No new civilian nuclear reactors have been proposed in the past 15 years. There is no need for this dangerous

operation to occur.

Please protect the citizens of the area by acting to prevent this LES plant's construction.

Thank you and best wishes in your new position as NRC Chair.

Sincerely,

Janet A. Hollis
