Mr. Newberry -

Do not license Watts Bar nuclear plant! Congress, as well as your agency, + even the TVA itself, have conceded its dubious distinction as the riskiest, most expensive + highest in terms of employee harassment/intimidation charges in the nation.
Its 20+ years under construction render it virtually obsolete; a typical nuclear plant ~~cost~~ cost more to decommission than to build, + the radioactivity poses ~~dangers~~ for longer than the average 30-year plant lifespan.
Its a matter of life + death - on a large scale.
Please respond.
Sincerely,
Therese Clarum
