

Texas State Technical College Waco Nuclear Education Scholarship

Executive Summary

Texas State Technical College Waco, a state and national leader in technician training programs, requests funds to continue its successful Nuclear Education Scholarship Program. The funding will enable twenty or more quality students each year to pursue technical training programs designed to prepare them for entry-level positions in Texas's growing nuclear power industry. Currently, students in TSTC's Environmental Health & Safety/Radiation Protection program, Instrumentation program, Chemical/Environmental Laboratory program, and Industrial Systems & Engineering program are participating in the scholarship program, and the program's first graduates will be entering the nuclear workforce later this year.
