ENVIRONMENTAL REPORT (OLS)
REQUEST FOR ADDITIONAL INFORMATION
FILE: 0505.5 SERIAL: 6336

Your December 22, 1978 letter requested additional information necessary for review of the Midland Plant Environmental Report - Operating License Stage. Regarding certain questions on endangered species, Consumers Power Company provides the following general information:

ENDANGERED SPECIES, Question 1

Sylvia Taylor, Endangered Species Coordinator of the Michigan Department of Natural Resources has informed Consumers that there are no records of threatened or endangered species on the Tittabawassee to Kenowa-Thetford transmission line right-of-way. The final draft of the consultants interim report (see item 2 below) notes the siting of a marsh hawk on the right-of-way but indicates that this is likely a migrating bird.

ENDANGERED SPECIES, Question 2

Enclosed are six copies of INTERIM REPORT, Terrestrial Ecological Survey - Midland Nuclear Plant - Tittabawassee Substation - Gary Road Substation - 345 kV Transmission ROW, prepared for Consumers Power Company, by Asplundh Environmental Services and S&R Environmental Consulting, November 15, 1978.

The Midland Environmental Report (OLS) will be revised in January 1979 to reflect the above information.
