Vogtle Project

Docket Number: 50-424/526

United States Nuclear Regulatory Commission
Office of Inspection and Enforcement
Region II - Suite 3100
101 Marietta Street, N.W.
Atlanta, Georgia 30303

File: X7BG03M4
Log: GM-578

Attention: Mr. James P. O'Reilly

Reference: RII JPO 50-424, 425 Voids in Concrete Placements on Interior Walls in the Auxiliary Building, File X7B603-M4, Log 6M-557, letter of January 18, 1980

Gentlemen:

On December 20, 1979 it was reported to your office that a potential reportable item under 10CFR50.55(e) existed at Plant Vogtle concerning voids in concrete placements on interior walls in the auxiliary building.

Georgia Power Company has conducted a significant deficiency evaluation and an evaluation for a substantial safety hazard. It has been concluded that a significant deficiency and a substantial safety hazard did exist. Attached is the Georgia Power Company report concerning the voids in concrete placements on interior walls in the auxiliary building.

This response contains no proprietary information and may be placed in the NRC Public Documents Room upon receipt.

Very truly yours,

Doug Dutton

Doug Dutton,
Project General Manager
