Dear Sir:

I am hand writing this letter in the hope that it will remind you that there are actual living, breathing humans who will be strongly impacted by the proposed importation of foreign radioactive waste by EnergySolutions, Inc, a Utah firm.

I fear that because we have less people than most states and because we are oh so far away from the nation's capital there is a tendency to minimize the effect approval of the licensing request by EnergySolutions would have on my state.

Utah, and its people, is far too valuable a resource to be dismissed as a garbage can, a receptacle of the world's radioactive waste.

Please consider how you would feel about this waste being deposited in your state. Our children deserve better, as do yours.

Do not set this dangerous precedent. Once started, there will be no stopping it.

SECY-02

Don't forget us here in Utah.

Sincerely,

Susan White
