SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION - NRC SECURITY INSPECTION REPORT 05000445/2007405 AND 05000446/2007405.

Dear Mr. Blevins:

On September 5, 2007, the U.S. Nuclear Regulatory Commission (NRC) completed an in-office security inspection at your Comanche Peak Steam Electric Station Units 1 and 2. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on September 7, 2007, with Mr. F. Madden, Director, Regulatory Affairs, and other members of your staff.

This inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records and interviewed personnel.

No findings of significance were identified.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public document Room or from the Publicly Available Records (PARS) component of NRC's document system, ADAMS.
