Every time I hear that someone wants to dump their garbage here I can feel my blood pressure rise

Just because we have some space out here on our ~~desert~~ Goodle County it is no reason to start fully it up with garbage And to think that it is destined here from as far away as Italy is dumbfounding

There are a lot of places over there that they could easily take that junk rather than trash it on seas.

Do you think for one minute that Italy or any other place in Europe would be glad to take our junk? I don't think so!

If they make it - they take care of it

Has it occurred to anyone that we might have some trash to get rid of - What if we are all fed up with some one else - Do you think for one minute that they would accept ours? I can just hear them laughing their heads off.

Utah is a beautiful place - why would anyone want it to be called the State of Utah Dumpy

Money - right - find another way to make it. The way our population is growing we might have to use this area for homes or businesses - Save it Barbara Wilson
