Laura,
Here are the answers to most of your questions, so you can get started. I am still waiting for responses on numbers 5, 7 and 8, and will get them to you as soon as I hear from people.

1. p 2-22 - Falls and Prowell - should be Falls and Powell (no r) - Falls, W.F. and D.C. Powell. 2001. Stratigraphy and Depositional Environments of Sediments from Five Cores From Screven and Burke Counties, Georgia, U.S. Geological Survey Professional Paper 1603-A, p A.3.

2. p 2-67 line 38 should be Southern 2006d - the December Info Needs letter

3. p 2-109 - Katie sent these emails to Cristina yesterday for docketing.

4. p 2-136 line 38 should be 2007c. I checked, it was changed in the text, just did not get changed in the reference itself.

5. p 4-11 Table 4-2 - Charlie Kincaid will contact you with the source of this table.

6. p 4-43 Personal communication with Charles Hardegree - This is Dan Musatti's reference, and Cristina is working on it with him.

7. p 4-64 Table 4-5 still working on source

8. p 5-54 Table 5-7 - still working on source
9. p 6-11 (NRC docket...) There is a nearly identical statement in Section 6.2.2.1 of NUREG-1437, Vol. 1, with the same in-text reference: "Radon releases from tailings for hundreds and thousands of years are undetectable from background levels at a few km, or less than one km in some cases (NRC Docket 50-488 1986)." It was used like this in the other EISs. We searched ADAMS, and it doesn't pop up, and it isn't in the references for NUREG-1437 either. To make this a little cleaner, we could change reference to (NRC 1996) to refer to NUREG-1437, if you'd prefer.
