DOCKET NO. 11005711

836

March 14 '08

attn: Secretary

You must prohibit foreign nuclear waste from being dumped in the United States. No other country in the world is accepting nuclear waste from other countries. Salt Lake City, Ut. based Energy Solutions is seeking a license to import 20,000 tons of nuclear waste from decommissioned nuclear reactors in Italy. Utah Gov. John Huntsman Jr. supports a letter sent by Utah's Radiation Control Board to the NRC opposing the Energy Solutions' Proposal.

A measure introduced into Congress on Thurs., Mar 13 '08 by Rep Jim Matheson D-UT, Rep Bart Gordon D-Tenn, & Ed Whitfield R-Ky., would ban the importation of low-level radioactive waste from foreign countries & would ensure that America doesn't end up as the recipient of everyone else's radioactive waste.

This legislation must succeed; my grandchildrens' lives depend on it.

Patricia Messile
