DOCKET NO. 11005711

Mar. 28, 2008

Dear Secretary,

I am voicing my objection to Energy Solutions wanting to import low level radioactive waste from Italy. We should not have to take any waste from any country or state. Let them dispose of the stuff they use themselves.

The people of Utah will end up with all kinds of medical conditions and energy solution only cares about the money they would make. You can go into these mines & still smell the gases from the uranium, so we do not need their junk sent here.

Thank you

John & Jan Ciarus
